Food and Drink Insights – June 2024 Kitchen Garden Tour

For our Food & Drink insights activity for term 3 we organised a tour of our kitchen garden. It took place on the 13th June 2024.

We opened the invite via social media to all students and 15 confirmed they were interested.

Emily and Alex from the grounds team led a tour of the greenhouses and outdoor area where they are currently growing salad, vegetables and herbs for use across our outlets.

This initiative and collaborative project has seen a lot of interest from students and staff within the University and we will continue to develop and expand our selection of crops.

It has been a wet summer so far and the project is quite early in its development.
